## Appendix 7 – TRACKING / GPS SYSTEM

### DESCRIPTION OF THE EQUIPMENT

All competitors admitted to the start, will be using GPS (Global Positioning System) tracking equipment during the event, the main objective of which is the safety of the drivers and co-drivers.

This system developed by AMAWEB allows the Rally Control (RC) to determine exactly where each competitor is, detect eventual accidents and communicate with the crew and vice-versa via the mobile cell module incorporated in the equipment.

The equipment (same as the image on the right) installed in the vehicle, has **three buttons, a large red button in the middle that activates the SOS emergency number and two smaller buttons a green and a red one, that can be used to inform the crew status in case of retirement/accident.**

This communication is done in two ways, via voice allowing the RC and the crew to exchange information about reason for retiring, the state of the occupants and via the GPRS communication link, the equipment has with the Rally Control.

Upon activating any of the three buttons the RC is immediately notified that the competitors have activated them.

**During the delivery of documentation, the competitors** must supply a caution in the value of **€ 400,00 (four hundred euro)** to serve as a security deposit. The caution will be returned upon the safe return of the GPS equipment. The return at the end of the rally, is conditioned to the return of the GPS in perfect condition. Any damage or loss of GPS will be charged using the security deposit delivered by the

competitor.

## **TECHNICAL ASPECTS AND INSTALLATION GUIDE**

### **Technical Aspects**

The Competitors will not have to do any previous modification of the vehicle for the installation of the GPS equipment.

The equipment will be installed on the front arc on the right side of the vehicle next to the joint connecting the front lateral arc and the longitudinal element.

### **Installation Guide**

Before Scrutineering, AMAWEB will install and start-up the GPS equipment to test the working status of the equipment and the communication link with the Rally Control.

The equipment runs on internal battery power and does not need any connection to the vehicle electrical system.

At the end of the first day of the rally, the GPS will be dismantled for recharging, and mounted before exiting Parc Fermé for the second day.

At the end of the rally, AMAWEB will collect the GPS equipment, at the Final Regrouping or at the Final Parc Fermé, returning the check or deposit money.

**In case of retirement**, the competitor must contact the organization in the Rally Headquarters where they must return the equipment and receive back the caution fee.

**Deadline to return equipment: (Saturday) 07-08-2021 at 20:00.**

If this deadline is not accomplished, the caution fee will be not returned back.
