Geneva, 13 October 2025

Dear Sir,

Please find enclosed the FIA Grade 6A licence for the circuit of Foz Coa.

We request that you issue this licence, duly approved, to the circuit management and that you authorise them to display it, subject to any further conditions which may be decided on by the ASN and which must conform to the FIA regulations.

Would you also inform the circuit management that any modifications to the circuit must first be submitted to the FIA for approval; failure to do so may result in the suspension of the present licence.

The granting of this licence is a prerequisite for the submission of an application to organise on the circuit an event for the category covered by the said licence, but is not in itself sufficient to allow the registration of such an event within the framework of an FIA championship.

Although this licence, issued by the FIA in accordance with the most recent safety standards, is obligatory, it cannot be considered as procuring absolute safety in motor sport events, which by their nature are not devoid of risk, regardless of the precautions taken in accordance with the most appropriate criteria.

The conditions for issuing a circuit licence may only be considered as procuring a minimum level of safety; this licence cannot constitute an absolute guarantee of the safety of the circuit or of an event.

Responsibility for safety rests with the circuit owners and the organisers or promoters of events who use this circuit under the aegis of the national authorities and laws. The liability of the FIA in this matter is excluded, its mission consisting only in indicating the minimum safety rules which must be observed.

Would you please confirm good reception of the licence.

Yours sincerely,

Clément Lauté
Head of Operational Safety

FEDERATION INTERNATIONALE DE L'AUTOMOBILE

CIRCUIT LICENCE GRADE 6A

PERMANENT CIRCUIT

VALID FROM **03.10.2025** EXPIRING ON **03.10.2028**

Issued for the circuit of **Foz Côa (autocross) (POR)** in the configuration below which, at the date of issue of the present licence, complied with the minimum safety conditions and standards required by the FIA for the running of international motor races organised in accordance with the FIA regulations and only for the categories of cars included in the grade of the licence as specified above, in accordance with the definition given in Appendix O of the International Sporting Code.

The granting of this licence is a pre-requisite for the submission of an application to organise an event on the circuit, for the categories of cars covered by this licence, but is not in itself sufficient for an event to be entered on the calendar in the context on an FIA championship.

Length of the track measured in conformity with appendix O to the Code:	1 km
Direction of the track:	Anticlockwise
Reference width:	16 m
Pole position for standing starts	Left
Date of the definitive inspection:	16.04.2025
Inspector:	J.M Proust
Circuit plan reference:	FIA Licence 25 - Foz Coa - 25 09 17

The FIA shall only issue a circuit licence upon proposal from the ASN of the country of the circuit.

Paris, 13.10.2025

President of the FIA
Mohammed Ben Sulayem

CONDITIONS OF ISSUE OF LICENCE

- Art. 1: The FIA issues to the ASN a licence attesting that the circuit meets the minimum safety conditions required by the FIA according to the vehicles specified in the licence grade. The issue of the licence by the FIA does not relieve the ASN or any other party from any obligations, which may arise other than under the FIA's rules relating to the safety and organisational standards required to be met in respect of the circuit or any event staged at the circuit.
- Art. 2: The validity of the licence is subject to the minimum standard of safety required by the FIA being maintained, within the period of validity specified. The FIA reserves the right to withdraw, suspend or modify this licence, on the recommendation of its Circuits Commission.
- Art. 3: The licensee shall be obliged to comply in all respects with the terms and conditions of the FIA International Sporting Code and all the other FIA regulations which shall apply to this licence.
- Art. 4: In addition to the FIA homologation and, unless a specific waiver is granted in writing by the FIA, the circuit must be licensed by the host ASN, which shall inspect the circuit every year during the licence term and report to the FIA on any changes in the condition of the circuit which may affect the validity of the licence. The FIA reserves the right to intervene or to inspect the circuit itself, should this be considered necessary.
- Art. 5: The configuration of the circuit and its installations at the time of the FIA inspection will be shown on a dated plan which will be held by both the FIA and the circuit management, which will form an integral part of the present licence and which the management will make available, on request, to the race director (if appointed), the clerk of the course, or stewards of any international event. The plan will be updated by the circuit management and communicated to the FIA by the ASN every time a change is made in agreement with or to conform to a request from the FIA. Except as varied herein, changes made which have not specifically been agreed to on the plan and confirmed in writing by the FIA beforehand, to the layout or to any safety-related items, may cause the licence to be retroactively annulled as from the date of the modification.
Exceptions may be permitted for repairs or modifications made at or immediately before an international competition, to counter damage from causes beyond the control of the management, or to resolve a problem revealed only during the running of the event, always subject to the following conditions:
- the race director (if appointed) and the clerk of the course, must be satisfied that the changes are in the best interests of maintaining the minimum standard of safety consistent with the FIA licence and are unlikely to compromise the safety of spectators, officials or competitors;
- such modifications must be documented and reported to the FIA through the ASN at the first opportunity.
- Art. 6: The side of pole position as indicated on the licence may be modified in accordance with the event regulations of the competition.
- Art. 7: The FIA has the right to carry out an inspection prior to any FIA championship, cup, trophy, challenge or series event to be held on the circuit. All non-permanent circuits must also undergo an FIA inspection before the main international competition of each year: (including if delegated to the ASN by decision of the Commission).
- Art. 8: Subsequent to the issue of this licence, drawn up in accordance with the most recent safety standards in force with regard to the layout, the installations or the arrangements of the circuit, the FIA and ASN may not be held responsible in any way whatsoever, should an incident or an accident occur during an event. If an accident occurs, in testing or during an event, which causes the hospitalisation of any person, significant distortion of the car's cockpit or of track safety features (or demonstrates the efficiency of such features in a high-energy accident) the circuit management will be responsible for ensuring that a detailed report on the circumstances, the injuries and any damage to cars and circuit features is submitted to the ASN and, where the laws of the country allow, to the FIA. If the laws of the country do not allow this, the ASN should keep the FIA informed. The report should as far as possible include: video recording of the car and scene made immediately prior to, during and after the accident; team data recordings from the car; an engineer's report on the condition of the car; medical reports; marshals' and eye witness reports.
