Appendix 4 – Extracts from FIA ISC Appendix L relating to overalls, helmets and any other safety requirements.

All competitors are reminded of Appendix L of the FIA International Sporting Code, in particular its Chapter III - Drivers' Equipment. Drivers and Navigators must wear FIA 8856-2018 clothes.

Helmets (Appendix L, Chapter III, Art. 1) All crews must wear crash helmets homologated to one of the FIA standards listed in Appendix L. Wearing an open-face helmet is prohibited on vehicles that are not designed with a windshield. Crews of vehicles without windscreens must wear full-face helmets, of which the chin bar is an integral part of the helmet structure.

Frontal Head Restraint (FHR, Appendix L, Chapter III, Art. 3) All crews must use FIA approved FHR systems homologated to FIA standard 8858. Approved FHRs, anchorages and tethers are listed in Technical List N° 29. See also helmet compatibility chart in Appendix L, Chapter III, Art. 3.3.

Flame-resistant clothing (Appendix L, Chapter III, Art. 2) All drivers and navigators must wear overalls as well as gloves (optional for navigators), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2018 (Technical List N° 74). Please pay special attention to the prescriptions of Art. 2 concerning the correct wearing of the clothing elements! See also FIA Cross-Country Rally Sporting Regulations Article 47.1.

Any FIA-approved 8856-2018 garment customised using printing or transfers must be accompanied by a certificate from the manufacturer.

If necessary due to weather conditions and after approval of the Clerk of the Course, it is allowed to use a waterproof overgarment on top of the drivers' equipment, provided it complies with EN 14116 standard. The use of garments with index 3 is strongly recommended.

Biometric Devices (Appendix L, Chapter III, Art. 2.1) Drivers may wear a device to collect biometric data during racing.

- If the biometric device is integrated into a protective garment homologated to FIA Standard 8856, the garment shall be homologated to FIA Standards 8856 and 8868-2018.
- If the biometric device is a stand-alone device, then the device must be homologated to FIA Standard 8868-2018 only. This device must be worn in addition to the garment homologated to FIA Standard 8856.

Wearing of jewellery (Appendix L, Chapter III, Art. 5) The wearing of any type of jewellery, such as but not limited to neck chains, bracelets or watches prohibited during the competition. Exceptions to this rule, providing the CMO and / or Medical Delegate do not consider that due to size or location they may delay rescue or hinder emergency care are:

- i. The wearing of watch(es) by navigators, on the condition that the watch(es) is worn over the overall,
- ii. The wearing of a single band-style ring providing it does not restrict the natural range of motion of the hand, and
- iii. The wearing of body piercing(s) providing they are not worn in and / or around oral cavity.

MEDICAL AND SURVIVAL KIT (Appendix IV of the Cross-Country Rally Sporting Regulations) A sealed and valid Medical kit in accordance with the Specification for Cross Country Rallies and Bajas (Technical List n°83) must be placed inside the cockpit. Appendix 9 Environmental Policy

1 – Environmental Requirements

Drivers and their teams are responsible for complying with the environmental and regulatory requirements defined for the race:

- a) It is strictly forbidden to spill oil, fuel or other liquids on the ground. The organisation will provide a dedicated area in the Service Park for their proper disposal.
- b) It is forbidden to wash any type of vehicle inside the Service Park. Vehicles must be washed exclusively at the washing stations near the Service Park, as specified by the organiser.
- c) The use of an environmental mat is mandatory in the service and refuelling areas (not applicable in commercial service stations). The environmental mat must also be used under any other container or equipment with the potential to spill liquids onto the ground, including generators.
- d) Recycling bags will be distributed by the organisation and must be used by each team to correctly segregate the waste produced. When full, they must be closed and placed in the areas defined by the organisation in the Service Park for collection by the local waste management authorities.

Failure to comply with any of the defined environmental requirements could result in penalties for the team involved.

The Environmental Management Plan defined for the race will be available on the race website and on Sportity, with additional environmental information validated by federations and competent authorities. We recommend that you consult it.

2 – Environmental Incident Report

If any environmental incident is detected in the Service Park or during the race (for example, an accidental oil spill), it must be reported immediately to the organisation so that the defined containment plan can be implemented.

Any clarification or questions regarding the Environmental Management Plan should be sent to sustentabilidade@acp.pt

3 – Environmental Policy

ACP – Automóvel Club de Portugal, as the organiser of Baja Portalegre 500, is committed to the FIA Sustainability Programme, the FIM Environmental Code, the FPAK Environmental Sustainability Code and the FMP Environmental Code, with the aim of minimizing the environmental impact of the event and setting an example on environmental issues, both nationally and internationally.

Therefore, Baja Portalegre 500, through its Environmental Management System, will be guided by the following principles:

- Comply with applicable environmental legislation, as well as other obligations voluntarily assumed, including the FIA, FIM, FPAK and FMP regulations;
- Inform and train everyone involved in the organisation about its environmental policy;
- Promote environmental awareness among our stakeholders (organisation, drivers, teams, volunteers, media, spectators, partners and external suppliers) and encouraging them to comply with and enforce good environmental practices;
- Take into account the environmental impact when choosing partners and suppliers, as well as in the process of selecting and purchasing products and services;

- Reduce the environmental impact in terms of transportation, as far as possible, encouraging car sharing and the use of public transport;
- Promote responsibility in preserving the environment by managing and monitoring the direct and indirect impacts of the event, in particular energy consumption and associated greenhouse gas emissions, water consumption and other natural resources, and proper waste management;
- Encourage adequate and proactive management of environmental risk, in particular pollution prevention and emergency response to accidents and/or disasters;
- Promote the continuous improvement of processes, practices and environmental developments by defining and evaluating progressively more ambitious environmental objectives.

This Environmental Policy, supported by a strong “performance against objectives” attitude, will regularly be reviewed and updated, ensuring continuous improvement of the entire Environmental Management System.
